Projects

E-commerce | Under NDA

A platform for the promotion of eco-products and an environmentally friendly lifestyle. Users can buy different types of nutritional supplements, cosmetics, household cleaning goods, etc. Users also can buy a subscription for reading the latest industry news.

Responsibilities:

- Implementing admin mode

- Bugs fixing

- App maintenance

Role: Front-End developer

Stack: ReactJS, HTML, CSS

Healthcare | Under NDA

A platform for beauty salon owners. Creating job listings and connecting candidates to companies. Has implemented dynamic forms, created reusable custom UI components, created data-tables

Responsibilities:

- Modification of Redux store and project architecture

- Adding functionality

- Issues and bugs solving

Role: Front-End developer

Stack: ReactJS, Redux, CSS, JavaScript

B2B | Under NDA

Financial management and cost tracking platform for farm animal feed. The app tracks feed costs, health costs, and supplies used for the animals, and the app generates detailed expense reports. The cost information is used for billing based on the total cost of keeping animals within the yard.

Responsibilities:

- Building a scalable, flexible

- Writing high-quality code

- Error handling architecture

- Implementation of security and optimal speed of work under heavy loads

Role: Front-End developer

Stack: ReactJS, Redux, GraphQL, JavaScript, HTML

E-commerce | Under NDA

Platform allows users to find and trade financial instruments (stocks, indices, commodities, currencies and cryptocurrencies), display charts, get fresh financial news, show notifications and activity log both on desktop and mobile.

Responsibilities:

- Code refactoring

- Usability opti,ization

- Adding functionality

- Creating initial structure on UI side

Role: Front-End developer

Stack: React, Redux, Next.js, HTML, CSS

E-commerce | Under NDA

E-commerce management platform, which includes a lot of financial analysis features. One of the best features is the lazy loading. This is especially useful for the application because a a very big app total client side weighs over 1Mb.

Responsibilities:

- Leverage the inbuilt React toolkit for creating frontend features

- Create data visualization tools, libraries, and reusable code for prospects

- Integrate designs and wireframes within the application code

- Monitor interaction of users and convert them into insightful information

- Write application interface code with JavaScript

Role: Front-End developer

Stack: ReactJS, Redux, GraphQL, HTML
